All, Attached is the State of Oregon's, Department of Environmental Quality, 11/30/18 response letter on the Columbia River hydropower NPDES permit issue. They request EPA to withdraw the 10/1/18 notification and reissue it to DEQ on a timeline that allows coordination with the State of WA's certification under 401(a)(1) and addresses uncertainty with the Columbia River temperature TMDL issue. -Laura

Hi Jenny,

Thanks for the update and meeting with us last week. Is the PowerPoint you gave last week the same as the one you sent to me earlier in November? If not could you please send the one from Friday, it will be very useful for briefing managers and leadership.

Thank you,

McClure Tosch
Superfund Section Technical Lead
Yakama Nation Fisheries

Subject: Thank you for 11/30 WA federal hydro dams NPDES permits discussion

Thank you very much for the meeting on the Washington federal dams NPDES permits on Friday, 11/30. We appreciated the issues, questions, and concerns you raised on the permits. We also appreciated the conversation around ideas and advice for moving forward in addressing concerns and speaking with the Tribal Council.

As discussed at the meeting, I'm forwarding to you the pre-draft permit and Fact Sheet for the Grand Coulee Dam. This is very similar to the Lower Columbia and Lower Snake River dam permits and will also have the same changes we discussed in the meeting. We also look forward working together on the different issues we discussed on stormwater runoff, oil and water discharges, PCB discharges, temperature, and other issues.

We found out that on Friday as we were meeting, a court granted EPA's request for a stay on issuing the Columbia River temperature TMDL. It was originally going to be issued on December 17. It is unclear when it will be issued as it depends on a number of factors. I'm sure the EPA TMDL team will be sending a message once they have more information. This may or may not affect the timing of when we go out for public comment on the permits, and we'll be discussing internally. However, at this point, I believe I would go out for public comment either end of December or early January. I'm not sure if this affects the timing of when you believe Chris Hladick, Dan Opalski, and EPA support staff should brief the Tribal Council but wanted to let you know in case it does.

Thanks again. I'm sure we'll be in touch in the next week or two, but if you have any questions in the interim, please don't hesitate to let me know.

Sincerely,

Jenny Wu with Mike Lidgard, Martin Merz, Courtney Weber
